

**Ref: WRAS Material Approval**

Graphite Metallizing Corporation proudly announces that the Water Regulations Advisory Scheme (WRAS) has approved a grade of GRAPHALLOY® material as suitable for contact with wholesome water for domestic purposes.

Through a stringent testing process, WRAS approval indicates that the GRAPHALLOY bearing complies with the high standards set out by the water regulations within the United Kingdom

The GRAPHALLOY grade is certified as meeting the requirements of BS 6920-1:2000 and/or 2014 'Suitability of non-metallic products for use in contact with water intended for human consumption with regard to their effect on the quality of the water'.

**GRAPHALLOY Grade GM 690**

WRAS approval is the result of Graphite Metallizing's rigorous product testing to ensure the highest quality GRAPHALLOY products for the market.

For a copy of the WRAS Material Approval letter, please contact Graphite Metallizing Corporation at [sales@graphalloy.com](mailto:sales@graphalloy.com)

Very truly yours,
